Know the value behind your coins. Compare conversion rates, earning effort and fees before choosing a rewards app. See the illustrative comparison on page 7. Review the final redemption amount in the app.

REQUEST ANY DAY / SETTLEMENT AFTER REVIEW

Submit redemption requests any day of the week. Settlement takes **3-5 days after the coin chain-of-custody check** (verification of coin origin and transfer history). General redemption processing usually takes place around Saturday and Sunday.

P2P: transfer a minimum of 500 coins from your main wallet. A **5% transaction charge** applies. Confirm the recipient and final debit/credit amounts.

To redeem: choose the correct wallet, enter your UPI details, review the charges and track the request in your wallet.

A large coin balance means little until you know its conversion rate.

REWARD VIDEO CONVERSION RATE

AN ILLUSTRATIVE OTHER-APP EXAMPLE

If another rewards app offers **10,000 coins = ₹25**, that rate is equivalent to **400 coins = ₹1**. The examples below all use that same assumed rate.

Compare the full earning experience.

Look at the time needed to earn coins, activity availability, membership cost, redemption minimums and charges - as well as the coin-to-rupee rate.

Illustrative comparison: this example is not a verified rate for a named app or a claim about all competitors. Actual rates and terms vary. A higher value per coin alone does not guarantee higher earnings.
